

FloodBreak

REVOLUTIONARY FLOOD CONTROL

SHORELINE PROTECTION

PASSIVE AUTOMATIC FLOODGATES

NO PEOPLE, NO POWER. 24/7 FLOOD PROTECTION.

INNOVATIVE DESIGN

The FloodBreak Freeview Flood Barrier provides permanent passive automatic protection along rivers, levees, lakes, and coastlines without blocking views or limiting community access to the water.

The innovative design provides top tier performance with no need for people or power to deploy or close.

ELEGANT FLOOD PROTECTION FOR COMMUNITY ASSETS

PASSIVE FLOOD PROTECTION

Our system uses hydrostatic pressure created by the rising flood waters to automatically lift the gate upwards.

When the flood recedes, the gate automatically returns to its hidden position beneath the ground, allowing pedestrian and vehicular traffic to resume.
