

BICYCLE TOOL & PUMP STATION

BICYCLE TOOL STATION

- ▶ The Cycle Tool Station provides you with facilities where you can hang your bicycle on the grip and crank away.
- ▶ It comes with a set of durable and precise tools for performing the majority of adjustments and fault repairs on your bicycle.
- ▶ It provides essential tools and a convenient workspace for quick bicycle repairs.

BICYCLE PUMP STATION

- ▶ Our Pump Station offers a heavy-duty, weather-proof solution for inflating deflated tires.
- ▶ This innovative product is shaped like a traditional bicycle pump and is constructed with a solid stainless steel pump handle and an armored hose.
- ▶ The pump is made by one of the best international brands and is capable of withstanding rugged use.

KEY FEATURES

- ▶ **Outstanding Design:** Minimalistic, adaptable design to complement the region's architectural ethos.
- ▶ **Weather Proof Build:** Resistant to extreme weather conditions - heat, sunlight, dust, and rain. The products are constructed of Hot Dip Galvanized Steel and finished with a three-coat wet paint system of C5 Marine Grade. The wood used to create the feature design is 100% Burma Teak, which is renowned for its durability. Additionally, the logo is made of marine-grade stainless steel (Grade 316).
- ▶ **Maintenance Free:** Designed for public use, with minimal maintenance costs. Cleaning it with water and a cloth on a regular basis, just like any other street furniture, is adequate to restore its attractiveness.

TECHNICAL DATA

- ▶ **Steel:** Grade B, Hot Dip Galvanized, Sweep Blasted
- ▶ **Coating:** C5M Marine Grade, 3 Coat System
- ▶ **Stainless Steel:** Grade 316 (Logo)
- ▶ **Nylon:** Heavy Duty
- ▶ **Wire Rope:** Stainless Steel PVC Coated
- ▶ **Tools:** International Brands (Heavy Duty)
- ▶ **Color:** Any given RAL code to match the environment

CARE & MAINTENANCE

- ▶ The steel surface is protected with Hot dip Galvanizing and covered with Exterior Grade paint finish.
- ▶ The surfaces should be gently cleaned using warm water and clean soft cloths (or mild detergent with warm water) & should be cleaned well with a soft dry clean cloth.
- ▶ Avoid using abrasives, thinners, corrosives, solvents or powder based cleaning agents to clean liquid metal coated surfaces.
- ▶ Not advisable to use chemical cleaning agents containing acidic, alkaline or any harsh chemical substances.

SCRATCH REPAIR

Painted Steel surfaces that are scratched can be touched up only by professionals.
